

# MultiAlert911

E911 that sends Multiple Alerts

Now you can implement "A Better 911"

## MultiAlert911™

**Increase Safety & Profits** by implementing "A Better 911". E911 with optional MultiAlerts

- **When a subscriber calls 9-1-1 others are instantly notified via**
  - SMS text message
  - A telephone call; hear the 9-1-1 call with live *ListenIN™*
  - Email with the 9-1-1 call recording
- **Provision DIDs from any provider**

### We are revolutionizing E911 for VoIP.

Now any VoIP provider worldwide can easily and instantly provision E911 for DID numbers in the USA, Canada. Total safety & compliance.

**New! MultiAlerts\*** When a subscriber dials 9-1-1, a list of pre-authorized people are instantly notified by SMS, a telephone call with live *ListenIN™*, by email and a second email with a recording of the 9-1-1 call.

### Benefits of MultiAlert911— A Better 911

- Provision DID numbers from any provider
- Instant provisioning — iframe or API
- Add MultiAlerts for increased safety & profit
- MultiAlerts converts E911 from a commodity to a unique product differentiator
- Increase ARPU & double your profits on E911
- Complete safety and compliance
- *From the original founders of Dash911*

Simplify   
E911 all in one place.

*\*Patent pending*

### Alerts

**Revolutionary new safety feature coming October 15!**  
What you see here is just a sample of what's to come.  
New! ListenIN allows people you authorize to hear your call to 9-1-1 in real-time. They can speak to each other and help coordinate immediate safety measures.

**For example:**

Let's say that Alice has MultiAlert911 configured on her office phone in office 721. If Alice dials 9-1-1, MultiAlert911 will immediately send out Alerts using text, voice and email to the people Alice has provisioned in her MultiAlert911 profile.

Alice has listed the lobby security guard, Bob, and her office manager, Carol, as Alert contacts with ListenIN enabled. When Alice dials 9-1-1, in addition to SMS and email both Bob and Carol will receive a telephone call announcing that "A call to 9-1-1 was placed by Alice. To listen in, press 1". Immediately, Bob and Carol will be joined into a conference bridge where they will be able to hear Alice's live, in-progress 9-1-1 call. And, while listening to the live 9-1-1 call, Bob and Carol will be able to hear and talk to each other and plan an emergency response strategy in real time.

This allows Bob and Carol to immediately be aware of Alice's specific situation. They can then prepare for police or EMTs and plan an emergency response strategy in real time.

**MultiAlert911 increases the safety and response time for all 9-1-1 emergency calls.**

#### Alert Contacts

You can have up to five Alert Contacts.

Nickname	Phone	ListenIN?	SMS	Email	Gets Recording?	Web Hook
Bob	1(333) 333-3333	Yes		Bob@Guard.com	Yes	Edit Remove
